1. The Examiner has carefully considered Applicant's Response of 10/26/05. The Examiner does not find Applicant's traversal of the restriction requirement persuasive. In particular, Applicant argues that the dependency has forced the inclusion of the method limitations in to the product claim. This is not the standard for the proper restriction of product and process claims. The Examiner has asserted that the product can be made by an inventively different process. Applicant has not overcome this assertion. The restriction requirement is made final.
2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Paul Keller on 2 February 2006.

The application has been amended as follows:
cancel claim 7.

The prior art disclosing placing powder or a foil in contact with the body to be infiltrated, with no suggestion or teaching made that injection molding is used to place the infiltrant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
